This exploded view diagram illustrates the assembly of the LEGO Technic Motor with Gearbox. The components shown include:

- Motor:** A black and white motor unit with a grey axle.
- Gearbox:** A black and white gearbox unit with a grey axle.
- Connecting Beams:** Various orange and grey Technic beams of different lengths and shapes, including a long grey beam with multiple holes and a shorter orange beam with a gear hole.
- Pins and Connectors:** Several grey pins, a black pin, and a black connector with a gear hole.
- Labels:** The word "LEGO" is visible on the side of the motor and gearbox.

The diagram shows how these components are assembled into a functional motor and gearbox system.

Diagram illustrating the assembly of the motor and gear mechanism. The motor is connected to the power source. The gear mechanism is shown with three gears: a large gear (2x), a medium gear (2x), and a small gear (2x). The gears are connected by a belt drive system. The motor is connected to the power source via a cable. The gear mechanism is shown with three gears: a large gear (2x), a medium gear (2x), and a small gear (2x). The gears are connected by a belt drive system. The motor is connected to the power source via a cable.

This diagram illustrates the internal mechanical components of a LEGO Technic robot chassis. The central motor is connected to a series of gears, including a large black gear and a red gear. The chassis is constructed from orange Technic beams and connectors, with white and grey components visible on the sides. The diagram shows the assembly of the robot's body, including the motor, gears, and various structural elements.
